**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, 7, and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Vande Linde (US Pat. No. 5,613,827).

See the previously attached marked up drawing figure 1 of Vande Linde depicting the claimed features.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later

Art Unit: 3651

invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Vande Linde.

Vande Linde teaches the claimed invention as outlined above and uses a rotatable chain for his hard-coupled mechanical system. Vande Linde fails to teach a known rack and pinion system for his system and/or a clutching mechanism to control the movements. It would have been an obvious matter of design choice as to the type of system drive used to operate the hard coupled mechanical system based on design considerations such as space, control systems utilized and production. The mere selection of any of a number of known mechanical driving systems would well within the level of ordinary skill in the art.

#### ***Allowable Subject Matter***

5. Claims 2, 3, 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 10-17 are allowed.

#### ***Conclusion***

7. Applicant's arguments filed June 28, 2005 have been fully considered but they are not persuasive.

Art Unit: 3651

Regarding claim 1, the examiner is interpreting positioner 32 of Vande Linde to be the claimed horizontal positioner, and the positioner 33 of Vande Linde to be the claimed separate second positioner for moving arms in a vertical relationship. Although, both of these positioners perform vertical and horizontal movements of separate arms, the current claims do not require these features.

Regarding claim 7, based on the current claim language, it appears the device of Vande Linde is capable of activating and deactivating any of his arms since he utilizes an electronic control system, even though he does not specifically state this feature. This concept, if presented in a method claim format, would carry more patentable weight.

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
